### **Learning Objectives for Participants**

At the conclusion of this OMIinar, the participant should be better able to:

1. Explain the rationale for and discuss the process to implement developmental screening in young children.
2. Discuss the clinical features of children with medical complexity and care models that are necessary to provide optimal care to this population of patients.
3. Recognize physical examination findings of common and uncommon skin infections in children and adolescents.
4. Recognize clinical findings associated with Kawasaki Disease and MIS-C in children and adolescents.
5. Review how to manage children and adolescents presenting with enlarged lymph nodes.
6. Describe how to diagnose and initiate treatment for children and adolescents with attention-deficit/hyperactivity disorder (ADHD).
7. Identify the various modalities of teledermatology available for providers and families.
8. Discuss how to treat and counsel children and adolescents with different types of sleep disorders.
9. Identify and manage the common technologies used to support the chronic respiratory, enteral feeding, and neurologic needs of children with medical complexity.
10. Discuss principles of pediatric procedural sedation.

### **ACCME Accreditation Statement**

Children's Hospital of Philadelphia is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

### **AMA Credit Designation Statement**

Children's Hospital of Philadelphia designates this live activity for a maximum of **11.5 AMA PRA Category 1 Credits**™. Physicians should only claim credit commensurate with the extent of their participation in the activity.
