Learning Objectives for Participants

At the conclusion of this seminar, the participant should be better able to:

1. Apply the various components associated with conducting rigorous research in clinical and community settings.
2. Develop and justify research questions relevant to their field of practice, identify study designs and methodologies that appropriately address these questions, and collect and analyze quantitative and qualitative data to answer these questions.
3. Conduct high-quality research to evaluate clinical programs, examine diagnostic tests, and improve the quality of clinical care.
4. Report and disseminate research findings via scientific presentations, systematic reviews, and peer-reviewed manuscripts.
